Software engineer and technology lead. Grew up on a family farm and stay hands-on: as comfortable with a chainsaw or under the Ranger as in front of a codebase. Interested in supporting law enforcement training as a role player.

Experience

- **DocHub** — Joint Technology Lead (2017 - present)
Document workflow and e-signature platform serving more than 140 million users. Lead engineering with a small, fast-moving team in a compliance-heavy product.
- **PurpleGrain** — Founder (2023 - present)
Marketplace connecting agricultural service providers with farmers.
- **EarthPath** — Founder (early stage)
Energy resilience and lower-impact infrastructure.

Education

- **Master of Engineering (Mechatronics)** — University of Melbourne
- **Bachelor's degree, Mechanical Engineering** — University of Melbourne

Community and volunteering

- **CFA volunteer** while growing up on the family farm, until age 19.
- **Squash club committee member** (various roles) while at university.

Hobbies and interests

- Gym, running and time outdoors with my fiancé and our golden retriever.
- Fixing and building: the Ranger, chainsaw work, farm machinery.
- Software and automation side projects — most recently getting a drycleaner's label maker working again.
- Technology and markets: AI, energy and industrial automation.
